

## Cara pindah database versi 5

1. masuk c:\WINDOWS cari dan hapus file my.ini bila tidak ada kemudian
2. Jalankan billserver.exe setelah itu masuk menu tools
3. Pilih Database manager
4. click pindah ke d:\mysql pilih yes
5. Kemudian exit billingserver dan silahkan anda restart
6. apabila berhasil maka sukses dengan status di kanana bawah besedir=d:\mysql
7. apabila tidak berhasil silahkan jalankan ulang perintah tersebut

## Cara Pindah database versi6

1. Exit billserver6.exe nya
2. Masuk **C:\xampp** kemudian jalankan xampp-control
3. Stop mysqlnya dan hilangkan centang pada Svc mysql lalu exit
4. Copykan folder Xampp yang ada di C:\ ke D: setelah itu
5. Masuk **D:\xampp\mysql\bin** cari file my.cnf ( my )
6. File my tersebut bukalah dengan menggunakan notepad
7. Kemudian cari tulisan yang sama seperti berikut
8. \_\_\_\_\_

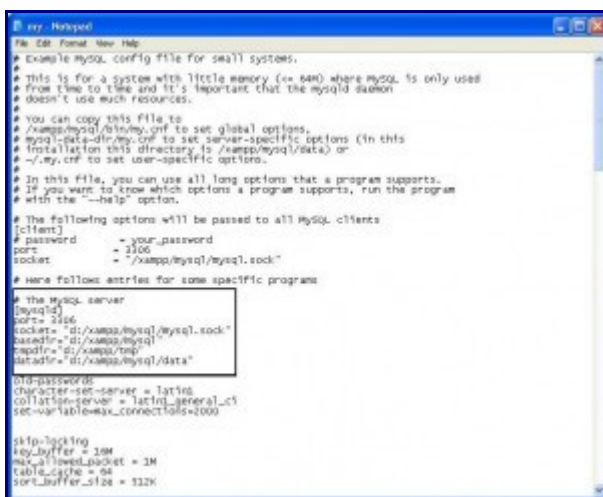

```
socket = "/xampp/mysql/mysql.sock"  
# Here follows entries for some specific programs
```

```
# The MySQL server  
[mysqld]  
port= 3306  
socket= "/xampp/mysql/mysql.sock"  
basedir="/xampp/mysql"  
tmpdir="/xampp/tmp"  
datadir="/xampp/mysql/data"
```

9. dan ganti seperti ini

```
socket = "d:/xampp/mysql/mysql.sock"  
# Here follows entries for some specific programs
```

```
# The MySQL server  
[mysqld]  
port= 3306  
socket= "d:/xampp/mysql/mysql.sock"  
basedir="d:/xampp/mysql"  
tmpdir="d:/xampp/tmp"  
datadir="d:/xampp/mysql/data"
```

```
File Edit Format View Help  
# Example MySQL config file for small systems.  
# This is for a system with little memory (<= 64M) where MySQL is only used  
# from time to time and it's important that the mysqld daemon  
# doesn't use much resources.  
# You can copy this file to:  
# /xampp/mysql/bin/my.cnf to set global options,  
# mysql-data-dir/my.cnf to set server-specific options (in this  
# installation this directory is /xampp/mysql/data) or  
# ~/.my.cnf to set user-specific options.  
# In this file, you can use all long options that a program supports.  
# If you want to know which options a program supports, run the program  
# with the "--help" option.  
# The following options will be passed to all MySQL clients  
[client]  
# password      = your_password  
port            = 3306  
socket         = /xampp/mysql/mysql.sock  
# Here follows entries for some specific programs  
# The MySQL server  
[mysqld]  
port= 3306  
socket= "d:/xampp/mysql/mysql.sock"  
basedir="d:/xampp/mysql"  
tmpdir="d:/xampp/tmp"  
datadir="d:/xampp/mysql/data"  
old_passwords  
character-set-server = latin1  
collation-server = latin1_general_ci  
set-variable=max_connections=200  
skip-logging  
key_buffer = 2M  
max_allowed_packet = 1M  
table_cache = 64  
sort_buffer = 32K
```

10. Kemudian anda save setelah itu close

11. Masuk D:\xampp\xampp-control

12. Centang Svc mysqlnya lalu start mysqlnya hingga running apabila sudah running berarti anda sudah berhasil
